```
Java
class Solution {
    public int minScore(int n, int[][] roads) {
    }
}
JavaScript
/**
 * @param {number} n
* @param {number[][]} roads
* @return {number}
var minScore = function(n, roads) {
};
C++
class Solution {
public:
    int minScore(int n, vector<vector<int>>& roads) {
```

}

**}**;
